Student Achievement Goals

Instructions: Please list the student achievement goals found in your School Improvement Plan along with baseline data and target data for each goal. Please express all goals as the percentage of a specific student group who reach a specified benchmark. The student group may be all students, a specific grade level, a specific student group (students participating in the federal lunch program, a specific ethnic/racial group, or a combination of groups (e.g. free and reduced third graders). The benchmark may be the percentage of students who graduate from high school, earn a specified score on the SAT or ACT, earn a specified grade in a specified course, have a specified GPA, pass the state math test, pass the state English test, master a specified academic standard, or read at grade level. Please talk to your principal if the achievement goals are not clear in your School Improvement Plan. IMPORTANT: Do <u>not</u> include non-achievement goals that may be found in your School Improvement Plan such as attendance goals or behavior goals.
